

A message from DNREC-MOSQUITO CONTROL

Weather permitting; the Delaware Mosquito Control Section plans the following insecticide application(s) during the evening hours on **Wednesday, August 19, 2026**:

Application of Zenivex E4 (etofenprox) with a truck-mounted sprayer to control adult mosquitoes in the following areas:

In and near New Castle and Delaware City.

Near Wilmington, Bear, Middletown, Townsend, Clayton, and Smyrna.

For notification purposes, spraying is planned for the following zone(s): **21, 22, 29, 30, 35, 37, 43, 62, 69, and 75.**

All insecticides to be used are registered with the U.S. Environmental Protection Agency (EPA) for mosquito control and will be applied according to EPA-approved label instructions.

The EPA has determined that these insecticides do not pose unreasonable risks to human health, wildlife, or the environment.
